Please decline NAB's petition 04-160 to be able to stop XM satellite radio from airing instant traffic and weather. I activately and consistently use and benefit from these channels as I'm driving in my truck for personal and business reasons. They are very useful and helpful in getting me toward where i need and have saved me many miles and time since its launch of its channels. I feel XM has done nothing wrong in all this and its very beneficial to me. I feel they have their rights to air this and i would do anything to help fight and back them up if needed. So please hear my voice and decline the NAB from being able to take this away from its customers. Thank you!
